

CLIENT ONBOARDING

What We Need From You

The accounts, access & data to get your platform live.

A short setup checklist — create a few accounts, grant some access, and send us your client details. Everything else, we build, run and hand over to you.

**Everything we need
to begin**

01 CHECKLIST

What We Need From You

A handful of accounts, access grants and inputs — everything else (all the software) we set up and run for you. Tick each box as you send it over. Sections 1–4 are all we need to start.

Your keys stay safe: every API key and password you send is stored in an encrypted key vault (Supabase Vault) the moment it reaches us — never in plain text, and never in our logs.

1. ACCOUNTS & API KEYS

Create each under your own billing, then send us the key.

- ☐ **serper.dev API key** — Google Search + Maps data that powers rankings and local results.
- ☐ **Anthropic (Claude) API key** — the AI that reads the data and writes the reports.
- ☐ **Resend account** — sends the client report emails.

2. HOSTING, DOMAIN & DNS

Your server and web address, in your name.

- ☐ **A server (VPS)** — a Hetzner CPX31 (~\$16/mo) or similar; SSH/root access, or approve us to rent one.
- ☐ **A domain name** — e.g. aios.yourbrand.com — for the app and the client portal.
- ☐ **DNS / registrar access** — login or permission to add records, so we can point subdomains and set up email.

3. GOOGLE SEARCH & ANALYTICS

We send one service-account email; you just add it inside Google. No passwords shared.

- ☐ **Google Search Console** — add our service-account email as an Owner on each site.
- ☐ **Google Analytics 4** — add it as a Viewer, and send the numeric Property ID.

4. GOOGLE BUSINESS (GMB)

For auto-posts, review replies & Maps rank. Uses Manager access.

- ☐ **A verified Business Profile** — verified and active (Google needs ~60 days of history).
- ☐ **Manager access** — add the Google account we give you as a Manager.
- ☐ **Business details** — business name, address, and location / Store ID if you have one.

5. YOUR CLIENTS & THEIR SEO

The starting set of 15 clients — a simple spreadsheet is fine.

- ☐ **Website address** — for each client.
- ☐ **Target keywords** — per client — plus the city / region / country to track.
- ☐ **Main competitors** — per client (2–5 websites), if you know them.
- ☐ **Existing data to import** — rank, backlink or audit exports (CSV / Excel). Optional.

6. BRANDING & BUSINESS

Used on the reports and the client portal.

- ☐ **Logo & brand colors** — and fonts, if you have specific ones.
- ☐ **Company name & footer** — contact details and report-footer text.
- ☐ **Team login emails** — who should sign in to the portal.
- ☐ **Legal / company details** — for invoices and the privacy & terms pages.

02 STEP BY STEP

How to Give Us Each Item

Follow the steps under each item. Tip: send anything secret (API keys, passwords) through the private link we'll share — never plain email. We store every key in an encrypted key vault (Supabase Vault) the moment it arrives.

🛡️ serper.dev API key

4 STEPS

1

Sign up

Go to serper.dev and sign up (Google login works). You get 2,500 free searches.

2

Open API Keys

Open the API Keys page (serper.dev/api-keys).

3

Copy the key

Copy the API key shown there.

4

Send it to us

Send us the key. No billing until you pass the free tier.

🛡️ Anthropic (Claude) API key

5 STEPS

1

Sign up

Go to console.anthropic.com and sign up or log in.

2

Add credits

Open Billing and add a payment method or buy credits — the key needs credits.

3

Create key

Go to Settings → API Keys → Create Key and name it "AIOS".

4

Copy it

Copy the key (`sk-ant-...`). It is shown only once.

5

Send it to us

Send us the key.

02 STEP BY STEP · CONTINUED

How to Give Us Each Item

✉ Resend account (report emails)

5 STEPS

1 Sign up

Create an account at resend.com.

2 Create key

Open API Keys → Create API Key and copy it (`re_...`).

3 Add domain

Open Domains → Add Domain and enter your sending address (e.g. reports.yourbrand.com).

4 Set DNS

Add the SPF / DKIM / DMARC records Resend shows — or send them to us.

5 Send key

Send us the API key.

💻 A server (VPS)

2 WAYS

OPTION A

Already have a server? Send us its IP address and an SSH login (root or sudo), or add the SSH key we give you.

OPTION B

Need one? Create a Hetzner Cloud account, add billing, make a Project, and invite our email — we set up the server (CPX31, ~\$16/mo).

🌐 A domain name

3 STEPS

1 Choose address

Decide the web address for AIOS (e.g. aios.yourbrand.com). A subdomain you own is perfect.

2 Buy if needed

No domain yet? Buy one at Namecheap, Cloudflare, or GoDaddy.

3 Tell us

Tell us the exact domain or subdomain to use.

☰ DNS / registrar access

2 WAYS

OPTION A

Easiest: give us login access to your registrar or DNS provider (e.g. Cloudflare), or add our email as a user — we add every record.

OPTION B

Prefer to do it yourself? We send a short list; for each record open DNS settings → Add record, paste the Type / Name / Value, and Save.

How to Give Us Each Item

🔍 Google Search Console access

4 STEPS

1 Get our email

We send you our service-account email (`name@project.iam.gserviceaccount.com`).

2 Open Search Console

Go to search.google.com/search-console and select the client's site.

3 Add as Owner

Open Settings → Users and permissions → Add user, paste our email, set Owner.

4 Repeat per site

Do this for each client site. If a site isn't set up yet, tell us — we'll help verify.

📊 Google Analytics 4 access

4 STEPS

1 Use same email

Use the same service-account email we sent you.

2 Open Admin

Go to analytics.google.com and click Admin (gear, bottom-left).

3 Add as Viewer

In Property access management click + → Add users, paste our email, role Viewer.

4 Send Property ID

Send the numeric Property ID (Admin → Property Settings, e.g. 123456789).

📍 Google Business Profile access

4 STEPS

1 Verify listing

Make sure the profile is verified. If it shows "Verify now", finish that first — it can take days.

2 Open profile

Sign in as the owner, then search your business on Google (or go to business.google.com).

3 Add as Manager

Open Business Profile settings → People and access → Add, paste our email, choose Manager.

4 Send details

Send the business name, address, and location / Store ID if you manage several.

02 STEP BY STEP · CONTINUED

How to Give Us Each Item

Your client list & SEO details

3 STEPS

1

Make a sheet

One row per client: website URL, target keywords, city / region / country, and competitors.

2

Add exports

Attach any existing rank, backlink, or audit files — optional.

3

Share it

Send us the sheet (a link or the file).

Branding & business details

4 STEPS

1

Send brand

Your logo (PNG / SVG) and brand colors (hex codes if you know them).

2

Send business

Company name, contact details, and any report-footer text.

3

Send logins

The email addresses of team members who need portal access.

4

Send legal

Company / legal details for invoices and the privacy & terms pages.

READY WHEN YOU ARE

Sections 1–4 are what we need to start building. Send those over and we'll take it from there — 5 and 6 can follow while we set up. Every key you send lands straight in the encrypted vault.
